Environmental Policy Statement

It is the policy of CA Drillers Ltd to do business in a manner, which reduces or eliminates any adverse affect on the environment. We recognise: -

- The importance of conducting our operations in a way that ensures the protection of the environment;
- That effective management of our environment makes good business sense and will be a fundamental and integral part of our business strategy;
- The need for the improvement at the workplace of our arrangements for the control of pollution and for care for the local environment.

In order to achieve these standards, the company will: -

- Comply with our legal responsibilities and play our part in influencing future legislation.
- Maintain an awareness of how our activities affect the environment and adopt good environmental practices in our day-to-day operations.
- Respond to the environmental concerns of our neighbours and the communities in which we operate, and respect the policies of our clients.
- Adopt environmental objectives to continually improve our environmental performance and monitor progress.
- Require our suppliers and subcontractors to have proper regard for our Environmental Policy in respect of the goods and services that they supply.
- Minimise any adverse affects of our activities by means of the best available, cost effective techniques.
- Consider the environmental impact of new equipment or new methods of working.
- Communicate this policy to our staff, suppliers and customers and seek their help in implanting it.

Our Environmental Policy will also include the following practical objectives: -

1. The conservation of resources, particularly those which are scarce or non renewable.
This includes: -
 - a) The avoidance of waste by re-using and recycling materials
 - b) The preservation, restoration and enhancement of the built and natural heritage.
 - c) Encouraging the sustainable use of the land based resources and certified timber and wood products.
2. A general reduction in air, land and water pollution.
3. Ensuring that all vehicles and machines meet emission standards, where possible using unleaded fuel. All equipment will also be properly maintained.
4. The use of registered waste disposal companies for removal of all waste streams.
5. Ensuring that any cleaning agents that are used are of a biodegradable nature and that any chemicals do not present an environmental hazard.
6. Limiting to a minimum and the possible elimination of all emissions to the atmosphere e.g. dust
7. Restriction in the use of any chemicals that may have a detrimental affect on the ozone layer.
8. Limiting to a minimum the use of electricity and gas supplies, and the elimination of wastage. Setting targets for reductions in energy consumption.
9. The reduction in the impact of noise crested in environmental sensitive areas.

THIS POLICY WILL BE REVIEWED ON AN ANNUAL BASIS.

James Amos Managing Director CA Drillers Ltd
